

### D3.3 working brief

Addressing the issue of excess waste in student households. The project aims to show how students can benefit from communal living as well as how they can reduce waste.

#### Aims;

1. To reduce waste in domestic bins to prevent them overflowing/ litter in student housing
2. To address the issue of how students produce excess waste
3. To encourage recycling in student households
4. To save students money

#### Potential Outcome;

A book or website to address the issues of waste disposal in a student community/ household that shows how students can save money and avoid excess waste

through a guide which will show students how to reduce waste. As a result the project also aims to show how students can benefit from communal living.
